ABOUT US

Passion and experience...

At Lumono, we are passionate about creating beautiful and functional living spaces that enhance your lifestyle. We make homes more Convenient, Entertaining, Efficient and Enjoyable through the discreet integration of the very latest in Smart Home Technology.

From a simple WiFi Upgrade to a fully integrated Home Automation and Entertainment System. We can provide an extensive range of built in solutions, to ensure your home remains cable and clutter free.

All installations are performed by professionally qualified and highly experienced Installers and all our installations come with a free 2 year On Site Warranty. We recognise the special care and attention to detail needed when building your dream home.

Give us a call and let us show you what we can bring to your project.

LIGHTING

Lighting Design & Supply

Good lighting is not just a practical necessity, its an art form capable of transforming the mood of your home to suit the moment. The skillful blending of light and shade brings drama and ambiance at the touch of a button.

We create detailed lighting designs that are not only beautiful but also practical, using the latest technology and our 20 years in the business to make the very best of your home.

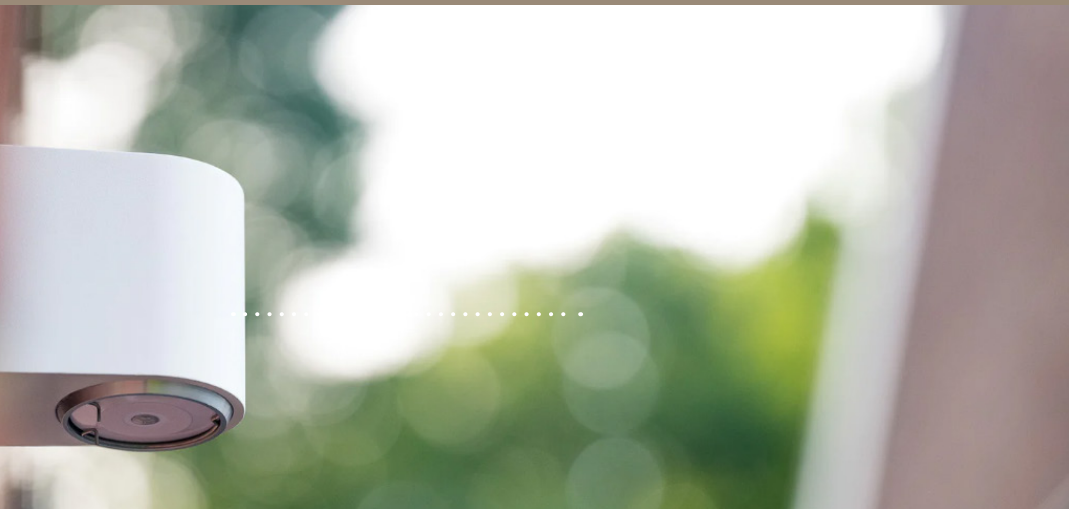

Lighting Control

Sensors placed in strategic positions in and around your home can automatically control lighting to conveniently light a space you're passing through such as a Utility Room or WC, or help protect your home from unwanted intruders.

Each room can have a unique set of lighting scenes for watching TV, reading, entertaining, or just relaxing. Each scene is called up with a single button press and with a whole house lighting control system you can even turn the whole house off with a single button.

AUTOMATIC BLINDS & CURTAINS

Convenience and Energy Saving

Automatic blinds and curtains offer unparalleled convenience and efficiency in your home. With the touch of a button or a voice command, you effortlessly control light levels and privacy, enhancing comfort and energy efficiency. Set schedules to open or close them at specific times, adding a layer of security by creating the illusion of occupancy when you're away.

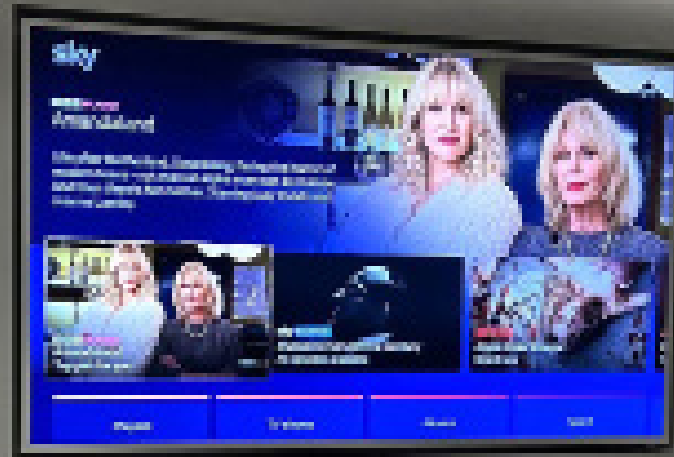

Control where you need it

When integrated with one of our Lighting Control Systems, the same keypad that controls your lights will also control your Blinds / Curtains.

BESPOKE AUDIO VISUAL

Multi-Room Entertainment

Hanging a TV on the wall is easy to do. Having it operate flawlessly from a single remote with all your other kit, whilst having no visible cables and fitting seamlessly into your decor takes a little more experience. We have 20 years experience, and pride ourselves on delivering the best in sound and picture discreetly around your home whilst making it so intuitive, your Grandma could operate it !

Whether its the 65" TV in the Living Room or the Speakers on your Patio, we aim to make sure it looks beautiful. Our customers tend to have beautiful homes so we believe its our job to integrate technology with flair and imagination to enhance your living spaces. We work along side interior designers, cabinet makers, decorators and other trades to achieve the very best results.

Dedicated Cinema Room

Home Cinema comes in lots of shapes and sizes. From a simple TV based surround sound system to a dedicated, fully automated Digital Projection based cinema room we have a vast amount of experience at hand to call upon. We can not only install your system but can also design and fully project manage your room fit-out.

Or Discreet Lounge Cinema

By using a retracting electric screen and projector lift along with In Ceiling Cinema Speakers, the entire system can disappear when not in use.

SMART HOME SYSTEMS

Simple Control of your Home

Whether you want to control everything in your home or just the essentials, a well designed and installed Smart Home System can certainly make your home more convenient to live in.

Whilst you can control pretty much everything with the latest system from Control 4, that doesn't necessarily mean you should. We'll walk you through the options and come up with a specification that works for your home and budget.

CCTV AND INTERCOM ANYWHERE

Remote Access

With one of our CCTV and Intercom Anywhere Systems, you're always connected, home and abroad. So, when that delivery arrives you'll receive a video call to your mobile, and with one tap of a custom button, you can open the gates, disable the alarm and open the garage door. Once the package is inside, another tap will secure the property.

CCTV

High Definition Cameras placed strategically around your property will be accessible from your mobile devices or any of the Touch Screens in your home for a complete view of the property wherever you are.

WORKING WITH LUMONO

We work along side Home Builders, Electrical Contractors and other Trades to deliver beautiful and functional homes throughout the North West.

5 SIMPLE STEPS

1 - We'll meet with you to discuss your project and take you through the options.

2 - We'll provide you with a fully detailed proposal.

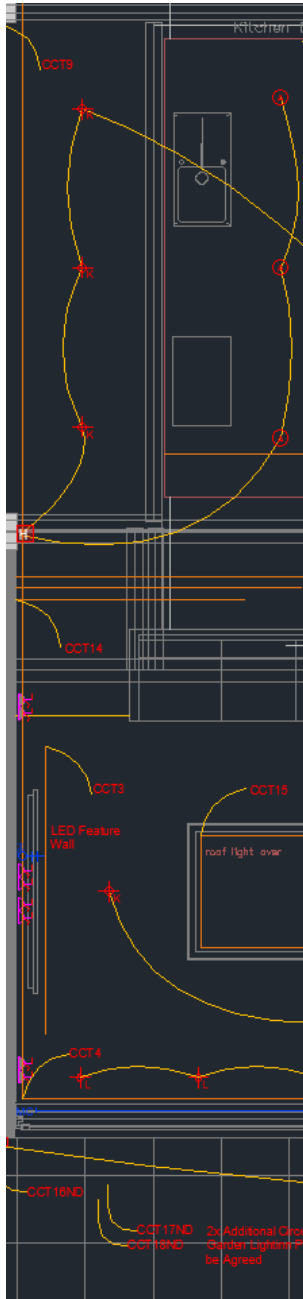

3 - We'll issue CAD Drawings and Cable to your Electrical Contractor and meet with them on site to take them through our cabling requirements.*

4 - We'll install and commission your equipment.

5 - We'll train you on how to use the system and provide on-going customer care.**

* On most projects, we work along side the customer's Electrical Contractors and they would ordinarily install the systems cabling to our detailed design. If preferred we can undertake the systems cable installation.

** All our Installations come with a Free Two Year On Site Warranty.
